

Senior Quantitative Researcher

Strategyn is a leader in the innovation consulting space. For over 30 years, we have been helping the world's foremost companies innovate and grow at rates faster than their competition. We provide data-driven customer insights that are the foundation of product and marketing strategies using our unique Outcome-Driven Innovation (ODI) methodology. Our work includes data analysis & insights, market research, innovation strategy, and other applicable consulting deliverables to clients across industries and countries. Our client industries include:

- Technology
- Healthcare
- Industrial
- Financial Services
- Consumer Products
- Automotive
- Entertainment

Strategyn helps companies reposition and reinvent underperforming products, create breakthrough products, successfully discover, and enter new markets, and prioritize R&D and M&A investment decisions.

We are looking for an intellectually curious and self-motivated person to join our Product team.

CANDIDATE ATTRIBUTES:

- Inquisitive and fast study, ability to quickly learn new skills and teach others.
- Excellent at communicating (written, oral, and active listening skills), able to alter your communication style for different audiences
- Data story-teller, able to take complex data and translate it into a meaningful and actionable story for a client
- Experience with different data analytics techniques, e.g., segmentation, comparative analysis, factor analysis, etc.
- Aptitude for diving deep and understanding the details while being able to synthesize information in logical order
- High level of professionalism and confidentiality
- Highly collaborative yet able to work independently
- Highly self-motivated, a self-starter
- Ability to effectively manage simultaneous priorities, ensuring timely delivery
- Business acumen

RESPONSIBILITIES:

The Quantitative Researcher provides the foundation for the data analytics work that we do at Strategyn. Strategyn is growing rapidly, so this individual will need to play a key role in continuing to refine and perfect this critical element of our ODI process. This position resides in the Product function within the company but will work closely with the Delivery team at Strategyn. Successful candidates for this role will be intellectually curious and possess an innate ability to create structure and process from complex and ambiguous subject matters.

Key responsibilities include:

- Lead a team of quantitative researchers
- Become a subject matter expert (SME) on questionnaire design and data analysis methods.

- Develop enhancements to Strategyn's process on questionnaire development, data analysis and strategy development.
- Assist executives with special requests / high-priority projects related to questionnaire design and strategy development.
- Conduct new/refresher training on data analysis methods
 - Conduct on-boarding training for new hires in questionnaire design, data analysis and strategy development
 - Keep training material content updated (existing + new modules in the LMS system)
 - Keep SOPs on questionnaire design, data analysis, and strategy development up to date.
- Oversee all client project work to ensure high quality output.
- As required, serve as chief instructor on client training-related projects
 - Advises the assigned Engagement Manager on managing the training activities planned for the project
 - Participates in SME role for client project meetings involving training, as requested by the Engagement Managers
 - Update Strategyn products based on learning from application work.
- Assist marketing team with content including but not limited to the website, blog, published article content, etc.

QUALIFICATIONS

- PhD in statistics, survey design, data analytics, or similar required
- 5-10 years of work experience, preferably in doing and improving quantitative research methodologies and experience managing a team of 3+ employees
- 6-sigma mentality, understanding of how business processes are measured and tracked (preferred)
- Proficiency to advanced skills with Microsoft office suite (PowerPoint, Excel, and Word)
- Advanced skills with Business Intelligence and Data Visualization tools (Power BI, Tableau)
- Advanced skills with statistical software and languages (SPSS, JMP, R, Python, SQL)
- Ability to work effectively in a Mac computing environment
- Experience with machine learning in AI is a plus
- Ability to propose alternative methodologies for all quantitative analyses
- Experience in teaching and managing others preferred
- Knowledge of different teaching methodologies preferred
